

## Health in All Policies Task Force

Julia Caplan, Project Director, MPH, MPP &  
Karen Ben-Moshe, Project Coordinator, MPH, MPP  
*Public Health Institute /  
California Department of Public Health*

*Food Access, Nutrition Education and Outreach  
Committee Meeting  
March 18, 2013*

## Acknowledgements

- California HiAP Task Force
- Public Health Institute
- California Department of Public Health
- California Strategic Growth Council

*With funding from The California Endowment,  
American Public Health Association, Kaiser  
Community Benefits and Community  
Transformation Grants*

## Health in All Policies Concept

**We all have a role to play in  
creating healthy communities.**

- Environments in which people live, work,  
study and play impact health
- Decisions made by "non-health" agencies  
play a major role in shaping environments
- Consideration of health allows agencies to  
make more informed policy and program  
decisions and to identify win-wins

## 5 Key Elements of Health in All Policies

- Promote health and equity
- Act in a manner that is multi-sectoral and collaborative
- Actions should benefit multiple partners
- Engage external stakeholders
- Create structural or process change to make government more effective

4

*Break down silos*

## California HAP Task Force

- Health in All Policies Report, December 2010
- 11 recommendations prioritized for near-term implementation
- External stakeholder input
- Cross-cutting themes
  - Interagency Collaboration
  - Promoting Equity
  - Community Engagement
  - Data
- 8 implementation plans in progress

5

## Aspirational Goals

All California residents:

-  have the option to safely walk, bike, or take public transit to school, work, and essential destinations
-  live in safe, healthy, affordable housing
-  have access to places to be active, including parks, green space, and healthy tree canopy
-  are able to live and be active in their communities without fear of violence or crime
-  have access to healthy, affordable foods at school, at work, and in their neighborhoods
-  California's decision makers are informed about the health consequences of various policy options during the policy development process
